Abstract submission deadline: 1 June 2016

Early registration deadline: 13 June 2016

In 2016, the annual EAU Robotic Urology Section (ERUS) meeting is coming to Italy! The 13th edition of the ERUS meeting will take place from 14-16 September 2016 at the MiCo Milan Congress Centre.

The ERUS meeting is the scientific platform for every urologist interested in the latest technical developments and the continuous progress of urological science and practice. The meeting's aim is to educate the urological community on robotic surgical techniques with the ultimate goal of improving the level of patient care.

ERUS16 will feature high-quality robotic surgery by international experts with interactive moderation. The focus of the meeting will be on practical instructions on robotic surgery with live-surgery sessions, courses by the European School of Urology and Hands-on Training courses. The highly interactive format of the meeting invites fruitful discussions. A technical exhibition will be held jointly with the meeting, where manufacturers will be showcasing the latest breakthroughs.

All EAU Events are accredited by the European Board of Urology in compliance with the UEMS/EACCME regulations.
